COME JOIN OUR TEAM

The City of Plano Community Emergency Response Team (CERT) is made up of citizens who have received specialized emergency preparedness training conducted by experienced emergency management professionals and first responders. In the event of a disaster, CERT members apply the decision-making, organizational and practical skills learned in the classroom and during exercises to:

- Effectively and efficiently offer immediate assistance to family members, neighbors, co-workers and others in their immediate area while waiting for professional help without placing themselves or others in unnecessary danger.
- Assist the City of Plano in various response and recovery activities upon activation.

Plano CERT members also play an important role in non-emergency events by educating the public and providing essential support services during community events.
