

HOW DO I FIND MY WQA

1

Find Current Winter Quarter Period Average

Use 3 out of 4 months of the lowest volume.

*Volume in Gallons

2

Find Average Volume

Add the 3 months with lowest volume, divided by 3 to find current period average.

3

Find New WQA (3 years rolling average)

Take previous 2 years period averages, add current period average in step 2 to find new WQA.
